Ford cars can be found all over the world, and vintage models appear at most classic car shows. This book helps to identify the models sold by Ford of Britain, and provides detailed information on each model, with technical specifications, original colour photographs, and lists the colour schemes that were available. Continuing this popular series covering classic British cars, David Rowe now turns his keen eye to the British Ford models. He is well placed to do so, having worked at two Ford dealerships over a 30-year period and has driven many of the models covered by this book.

First Published in 1942. Phillips has written an important study covering three areas: three areas: theoretical, empirical, and public policy. This book explores some of the explanations for and consequences of globalized production by transnational corporations. A review of the theoretical underpinnings of the reasons for corporate overseas expansion precedes a discussion of transnational corporation overseas production facilities. The literature reviewed supports the position that the exodus of manufacturing capital has been assisted by state policy which has encouraged capital flight, and that corporate efforts to downsize manufacturing operations in the United States have added to corporate profitability and championed profits over the strengthening the domestic economy.
